

Installation

<p>Step 1: Turn off the power before installation and testing to ensure safety</p>	
<p>Step 2: Drill mounting holes on the installation surface and fix the screws onto the mounting bracket</p>	
<p>Step 3: Connect the lamp power wires to the power supply</p> <ul style="list-style-type: none"> - Blue wire connects to neutral (N) - Brown wire connects to live (L) - Yellow/green wire connects to ground (Earth) 	
<p>Step 5: Check, turn on the power, and test operation</p>	

Warning

Installation of lighting fixtures should be carried out by qualified professionals. If installation must be performed without a professional technician, please follow the instructions below:

- a. Turn off the power supply before installation or maintenance
- b. Prepare necessary tools such as wire cutters/strippers, electrical tape, or quick connectors
- c. Use a voltage tester to check before installation
- d. Use a proper ladder to access the installation position, ensuring stability when working at height
- e. To ensure optimal durability, avoid using the lamp in environments with high corrosion levels
- f. During use, if any abnormal signs occur, immediately disconnect the power and stop using the product
- g. To ensure proper operation, use the correct voltage as indicated on the product label
- h. For detailed warranty policy, please visit: <https://ecolighting.com.vn/bao-hanh/>
