

Installation

<p>Step 1: Turn off the power before installation and testing to ensure safety</p>	
<p>Step 2: Connect the wires inside the street light pole</p> <ul style="list-style-type: none"> - Blue wire connects to neutral (N) - Brown wire connects to live (L) - Yellow/green wire connects to ground (Earth) 	
<p>Step 3: Mount the light onto the pole</p>	
<p>Step 4: Tighten the screws to fix the light</p>	
<p>Step 5: Check, turn on the power, and test operation</p>	

Warning

Installation of lighting fixtures should be carried out by qualified professionals. If installation must be performed without a professional technician, please follow the instructions below:

- a) Turn off the power supply before installation or maintenance
- b) Prepare necessary tools such as wire cutters/strippers, electrical tape, or quick connectors
- c) Use a voltage tester to check before installation
- d) Use a proper ladder to access the installation position, ensuring stability when working at height
- e) To ensure optimal performance, avoid using the lamp in environments with high humidity
- f) During use, if any abnormal signs occur, immediately disconnect the power and stop using the product
- g) To ensure normal operation, use the correct voltage as indicated on the label
- h) For detailed warranty policy, please visit: <https://ecolighting.com.vn/bao-hanh/>
